

## QUOTE OF THE DAY

We do not see the war being waged against us because we don't want to and because we are afraid. we are engaging in behavior specifically designed to block out any awareness of the war our true reality.

What this means to me is that the government wants us to be distracted by things like social media and entertainment. This is just like This is America because just like in the video we were distracted by the dancing while the things in the background happened such as killing, robbing etc .

## TOPIC OF THE DAY

Black men and women relationships in a patriarchal society I think are society in general not just black people is based off of patriarchal. Men mainly have better jobs and earn more money than women do and society makes it seem like men are the dominant gender.
