

## QUOTE OF THE DAY

Once you do something for a while you get used to it. For example the slaves knew that they were enslaved but it was at a extent. They knew what was happening to them was wrong but they didn't really know that they were slaves.

## TOPIC OF THE DAY

### DEFEATING THE ODDS AS A BLACK MAN

I think defeating problems as a black man is black men proving people wrong. This started because black people were enslaved and that put them at a disadvantage when they were freed. Since then we have still been judged. For example your always going to be at a disadvantage compared to everyone else
